

WOOTTON PARK SCHOOL

FSA Architects Project

ENTER

INTRODUCTION

- Project Lead
 - Duncan (Senior Associate Architect)
- Supporting Lead
 - Andrew Hutchin (Senior Architect)
- Support
 - Michael Flinders (Architect)
 - Paul Sawyer (Senior Technician)
 - John Cooke (Architectural Technologist)
- Project Software used – AutoCAD, Revit
 - Site layout and plans created in AutoCAD
 - Other than site plans, the rest of the Wootton Park School Project is done in Revit using BIM level two discipline, with an agreed BIM Execution Plan with the contractor, structural and civil engineers and electrical and mechanical engineers.
- This is a new School project.
- My involvement comes in after planning is approved, for the start of the technical development. My role in this project was to support Andrew Hutchin with any alterations requested by the client and create any drawings or details required.

ACCESS STRATEGY TO BE REVIEWED AND AGREED WITH THE
END USER

- Classrooms** - Door unlocked during occupied hours. Lever handles, screened egress, cylinder lock outer and thumb turn inner. Self closer.
- Offices** - Lever handles, screened egress, cylinder lock. Self closer if required to fire.
- Doors (general)** - Lever handle, screened egress, cylinder lock outer. No self closer as requested by the school. Fire door keep shut signal. Blowing plate in inner leaf of door preventing locking from inside the store. Pushbolts to double doors.
- WCs** - Lever handle, bathroom lock with emergency release, privacy indicator.
- ICT/Office/Store** (access controlled as stated) - Lever handles, screened egress, cylinder lock outer and thumb turn inner. Self closer. Pushbolts to double doors. Access control to MSE requirements.
- Cross Corridor** (access controlled as stated) - Pull handle and push plate, self closer. Door holding device access control to MSE requirement. Fail safe on fire alarm.
- Circulation** (access controlled as stated) - no hold open - Pull handle and push plate, self closer. Access control to MSE requirement if required. Fail safe on fire alarm.
- Stair** - Pull handle and push plate, self closer.
- Sports Hall** - Pull handle and push plate, door closer, 4 x store room doors with key lock. End user to confirm projecting terminology in sports hall. Off flush non-emergency.

NB: Lock outlets to be secured with end user.
All lock plates to be round edge finish not square.

- External Doors**
- Main Entrance** - Door automation with key lock outside (open, closed, auto). Fail safe on fire alarm activation. Unlocks on fire alarm. Push button & safety sensors.
- Managed door (Unlocked during occupied school hours)** - Pull handles, pushbolts to double doors, door closer, cylinder and turn.
- Managed door (General)** - Unlocked during occupied community and school hours. Pull handles, pushbolts to double doors, door closer, cylinder and turn.
- Fire Escape** - Panic non-emergency, self closer.
- Plant/ External Store** - Restricted access. Pull handles, pushbolts, door stays, key lock.
- Managed door** - Pull handles, pushbolts, door closer, cylinder and turn.

- ZONE OF COMMUNITY ACCESS
- ACCESS AND CIRCULATION
- FIRE ESCAPE ROUTE
- SECURE LINE

NOTES
ALL DOORS TO BE FITTED WITH DESCRIBED, UNLESS OTHERWISE IDENTIFIED ALTERNATIVELY ON DOOR SCHEDULE 6002 - LOCKING GLASS.
LOCK PLATES TO BOTH SIDES.
LOCKING SUITS TBC.
UNIVERSAL TFC.
FIRE ALARM LINKED HOLD OPEN DEVICES TO BE FITTED TO DOORS ON CENTRAL CIRCULATION ROUTES & DESIGNATED FIRE ROUTES AS DEFINED.
DESIGNATED FIRE ROUTES TO BE CORRECTLY SIGNED, AND DERIVED ON FIRE STRATEGY/CIRCULATION & ACCESS STRATEGY/DOAM MANUAL.

CONSTRUCTION

CDM Residual Risks

Residual risk to the health and safety of construction workers from the proposed works is assessed as low.

It is assumed that the works will be carried out in a competent manner, using appropriate equipment, and in accordance with the relevant regulations.

CDM Residual Risks

In addition to the hazards also normally associated with the types of work detailed on this drawing, please note the following:

It is assumed that work will be carried out by a competent contractor working, where appropriate, to an approved method statement.

AIRTIGHTNESS

PRIMARY LINE
Sealed line made from Cement Partical (CP) board with taped edges to closed junctions. CP board to be fixed to SFS frame. Self adhesive damp proof membrane to be bonded to primed CP board to form air tight junction at abutment. Openings, where possible frames to have EPDM gaskets, bonded to the external face of the CP board. (See standard details for customer).

SECONDARY LINE
Vapour Control Layer (VCL) on the internal line of plasterboard, taped/bonded to PFL / Soffi line. Penetrations to be avoided where possible. Any penetrations to be correctly sealed to retain airtight line.

For locations of details refer to the following drawings:

Plans:

SFS FRAME MUST BE SUPPORTED BY A MINIMUM OF 2/3RD THE WIDTH OF THE TRACK BY A PRIMARY STRUCTURAL ELEMENT.

WHEN BEARING IS NOT ACHIEVABLE REFER TO MANUFACTURE GUIDANCE AND CONFIRMATION. POSSIBLE SOLUTIONS:
1. INTRODUCE SUPPORT ANGLE TO SIDE OF SLAB
2. INTRODUCE ANCHORED PLATE UNDER SFS
3. 2" BAR SUPPORT UNDER SFS.

6 SFS _ SETTING OUT / SUPPORT
1:2

CDM Residual Risks

In addition to the hazardous risks normally associated with the works of work detailed on this drawing, please note the following:

It is assumed that works will be carried out by a competent contractor working, where appropriate, to an approved method statement.

AIRTIGHTNESS

PRIMARY LINE
Sealed line made from Cement Portland (CP) board with taped edges to closed junctions. CP board to be fixed to SFS frame. Self adhesive damp proof membrane to be bonded to primed CP board to form air tight junction at abutment. Openings, where possible frames to have EPDM seal, bonded to the external face of the CP board. (See standard details for guidance).

SECONDARY LINE
Vapour Control Layer (VCL) on the internal line of plasterboard, taped/bonded to FFL / Soffit line. Penetrations to be avoided where possible. Any penetrations to be correctly sealed to retain airtight line.

For locations of details refer to the following drawings:

Plans:

CONSTRUCTION
CDM Residual Risks
It is assumed that walls will be constructed to a consistent construction meeting, where appropriate, to an approved standard.
ACQUISITION
PRIMARY LINE
Sound line made from Current Particular (CP) board with tapered edges to closed junction. CP board to be fixed to SFS frame. Self-adhesive damp proof membrane to be bonded to primed CP board to form an SFS junction to absorption. **Secondary**
Secondary LINE
Vapour Control Layer (VCL) on the internal face of plasterboard, applied to SFS frame. Self-adhesive damp proof membrane to be applied where possible. Any penetrations to be correctly sealed to retain airtight line.

CONSTRUCTION

CDM Residual Risks

In addition to the already listed risks, the following risks are associated with the construction of the building. These risks are to be managed.

It is assumed that the risks will be controlled by a competent contractor, where appropriate, in an approved manner.

ABSTRACT

PRIMARY LINE
Control line inside from Concrete Particular (CP) board with tapered edges to closed junction. CP board to be fixed to SPS frame. Self-adhesive damp-proof membrane to be applied to ground CP board to form a tight junction at abutment. (Details to be provided by the contractor to form a tight junction at the external edge of the CP board.)

SECONDARY LINE
Vertical Control Layer (VCL) on the internal face of plasterboard. Separated from the SPS frame. Foundations to be avoided where possible. Any penetrations to be correctly sealed to retain airtight line.

AIRTIGHTNESS

PRIMARY LINE
Sealed line made from Cement Partical (CP) board with taped edges to closed junctions. CP board to be fixed to SFS frame. Self adhesive damp proof membrane to be bonded to primed CP board to form air tight junction at abutment. Openings, where possible frames to have EPDM that is bonded to the external face of the CP board. (See standard details for guidance).

SECONDARY LINE
Vapour Control Layer (VCL) on the internal line of plasterboard, taped/bonded to FFL / Soffit line. Penetrations to be avoided where possible. Any penetrations to be correctly sealed to retain airtight line.

For locations of details refer to the following drawings:
